climbing tools
HAFTGOHAR

www.haftgohar.com

« Due to the mountainous region of Iran, mountain climbing is one of the most popular sports in this country, considered as a group of sports in which applying tools play a significant role. These tools are necessary not only for execution a successful climb but also for health and safety of the climber. Climbing in hard situations, demand tools which are applicable in such condition.

As the industrial development of every country have a meaningful relationship with the ability of designing the production tools, we believe that growth and development of the mountain climbing has a connection with the knowledge and technology of producing the necessary tools.

Haftgohar Co. with over 30 years of industrial experience have designed and produced production lines for different companies and we produce climbing tools with over 25 different products, which are designed based on customer needs and global standards. Industrial products, to have a competitive price, continues desirable quality and capability of mass production, need to have special molds and fixtures, machines, assembly lines and control tools. In Haftgohar We provide these products for our customers »
